RE: Imposition of Wastewater System Development Charge - AK# 9105238

Please be advised that the Key Largo Wastewater Treatment District's ("the District") Board of Commissioners ("the Board") will consider imposing a System Development Charge ("SDC") for the above-referenced parcel at its regularly scheduled meeting on July 16, 2024.

The SDC is the initial charge to each Tax Parcel assigned a parcel Alternate Key number by the Monroe County Property Appraisers Office and represents a portion of the Capital Costs for the construction of the District's Wastewater Management Facilities.

Reason for imposition of SDC: The District has been advised by the Monroe County Property Appraiser that tax parcel AK# 9100452 has been split to create a new tax parcel, AK# 9105238. The new parcel will be added to the 2016 Assessment Roll.

If the Board approves imposition of the SDC charge, the following changes will be made to your account:

<u>EDU Assignment</u>: The new tax parcel will be assigned one Equivalent Dwelling Unit ("EDU"). See attached for calculation.

<u>System Development Charge (SDC)</u>: Equal to the sum of the capacity charge per EDU plus the connection charge to extend service to your parcel. See attached for calculation.

Monthly Base Charge: Upon development of the parcel, you will be required to pay a monthly base charge of \$27.13 per EDU. The charge will be included in your monthly Florida Keys Aqueduct Authority ("FKAA") bill.

The total SDC charge will be \$5,840.00. Parcel owners have two options for paying the assessment:

1. <u>Pay in full:</u> If you choose to pay the SDC in full, you must do so no later than August 31, 2024. Payment may be made in person, online at <u>http://klwtd.com/check-my-assessment/</u>, or by mailing a check to the District administrative office located at 103355 Overseas Highway, Key Largo, FL 33037 (please include the Alternate Key # listed on the first page of this Notice).

2. <u>Pay in installment payments</u>: If you choose not to pay the SDC in full before August 31, 2024, you will automatically be enrolled in the District's installment payment plan whereby the SDC will be paid in annual installments.

a. The first installment will be included in your 2024 Monroe County Annual Tax bill.

b. The amount of each installment payment will be equal to 1/8 full wastewater SDC plus interest and costs, which will vary from year to year. The interest rate is based on the District's borrowing rate which, for the 2024 assessment year, is 2.590%.

c. At any time during the 8 year period, the owner of record may pay off the unpaid balance of the SDC. Pay off amounts are available from the District's Customer Service Department.

Your Rights: You have the right to appear at the meeting, present evidence, and have witnesses testify on your behalf. If you choose to appear or present evidence, please notify the Clerk and submit copies of any documents you would like the Board to consider no later than 15 days from the date of this Notice.

Please contact the Customer Account Specialist at 305-451-4019 ext. 209 or alexis.irizarry@klwtd.com for more information concerning how the proposed action will impact your parcel or for confirmation of the meeting date.

Key Largo Wastewater Treatment District – 10/1/2024 to 10/1/2025 Insurance Renewal

8/12/24

Brown & Brown is dedicated to working hard for our clients' best interest. When we work with teams like Peter's team at Key Largo Wastewater it does make everything go smoothly. In this difficult insurance market we face in Florida it is crucial that our clients work closely with us and Connie and Jennifer do just that. We are very grateful to work with this team year after year.

The property market has stabilized, but we continue to see strict underwriting guidelines, tight capacity, and increased costs. The reinsurance markets are organizing and renewals don't seem to be as chaotic as we have seen the past two years. We will continue to see certain geographic locations and business classes that will see higher rates and coverage limitations.

Key Largo Wastewater reviewed their property values and decided to maintain the same values at \$25,363,819. The carrier agreed to offer terms using the same limits as last year. Their premium will remain flat. StarStone continues to recognize this is a favorable risk.

The Catastrophe Model/AIR report was analyzed last year and the 250 Year PML (Probable Maximum Loss) resulted in \$5,188,062.

The 10/1/24 renewal proposes:

- Renewal of the PGIT General Liability, Auto Liability, Public Officials, Employment Practices Liability with a \$10,000 deductible for a combined annual premium of \$121,406. A decision was made by Peter to increase the Public Officials & Employment Practices deductible from \$10,000 to \$25,000 for a savings of \$7,600. This change brings the renewal premium to \$113,806 as compared to expiring of \$117,485. This is a reduction of approximately 3% from last year's premium and a reduction of 6% from this year's original quoted premium.
- 2. All Risk Property coverage with Starstone Specialty with a named storm sub-limit of \$1,750,000 and an all other peril sub-limit of \$5,000,000. All other perils deductible of \$100,000 and named storm deductible of \$1,200,000. Note that your total insured values remain to be \$25,363,819. The annual premium for Property with Starstone Specialty is \$201,609 as compared to expiring of \$201,109. This represents a flat renewal. The small difference in premium is due to an inspection fee that must be charged this year. This flat renewal shows the market is stabilizing.
- 3. Inland Marine: Last year a decision was made to pull the inland marine equipment off the property schedule and find a monoline market to cover these items separately. This decision was made because the high deductible on the property did not make sense for these smaller valued items. The inland marine value is \$1,677,696 and was not changed for 2024. The quoted

premium is \$49,154 compared to last year's premium of \$40,004. The underwriter does not have another market that will consider wind coverage in the Keys. We worked with two brokers on this and there is only one market willing to quote with wind. The Keys is one of those geographic locations that carriers apply a higher rate to.

- Renewal of the Workers' Compensation coverage with PGIT at an annual premium of \$44,499 as compared to expiring of \$44,783. The District's experience modification factor decreased from 1.02 to .85. The payroll increased from \$2,919,113 to \$3,108,855.
- 5. Crime Coverage is year two of a three year policy with Travelers Insurance Company at an annual premium of \$1,028.42 which represents a flat renewal.
- 6. Boiler & Machinery Coverage with Travelers Insurance Company at an annual premium of \$10,412 compared to \$9,784 from last year. The increase is a result of a limit change that the carrier is mandating due to inflation. The limit has increased from \$24,910,736 to \$28,826,828.
- Cyber Liability with CFC at an annual premium of \$9,775 compared to last year's premium of \$9,775. This is the second flat renewal with this carrier. KLWW is doing everything right to safeguard their system and the carrier has noticed.
- Fiduciary Liability coverage is being renewed to cover the Districts exposure from the KLWTD 457(b) Plan and group health plan, at an aggregate limit of \$1,000,000. The annual premium is \$2,911.83 compared to expiring premium of \$2,775.39.
- 9. Agency Consulting Fee: The fee of \$25,000 will remain the same which is still less than the fee in 2017.

RESOLUTION NO. 16-2024

A RESOLUTION OF THE BOARD OF COMMISSIONERS OF THE KEY LARGO WASTEWATER TREATMENT DISTRICT, LOCATED IN MONROE COUNTY, FLORIDA, ADOPTING THE BUDGET FOR THE FISCAL YEAR ENDING SEPTEMBER 30, 2025 FOR THE DISTRICT; PROVIDING FOR THE GENERAL MANAGER TO EXPEND FUNDS ON BEHALF OF THE DISTRICT; AND PROVIDING FOR APPLICABILITY AND AN EFFECTIVE DATE.

WHEREAS, pursuant to the Key Largo Wastewater Treatment District Act (Ch. 2002-337, Laws of Florida, as amended) (the "Act"), the business and affairs of the Key Largo Wastewater Treatment District (the "District") are conducted and administered by its five-member Board of Commissioners (the "Board"); and

WHEREAS, the Board has those administrative duties set forth in the Act and in chapter 189, Florida Statutes, as the both may from time to time be amended; and

WHEREAS, pursuant to the Act and section 189.016(3), Florida Statutes, the Board has the power and the duty to adopt a budget by resolution each fiscal year.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COMMISSIONERS OF THE KEY LARGO WASTEWATER TREATMENT DISTRICT THAT:

Section 1. ADOPTION OF THE BUDGET AND AUTHORIZATION TO EXPEND FUNDS.

(A) The District Utility System Budget for the Fiscal Year ending September 30, 2025, attached hereto as Exhibit "A" is incorporated herein and is hereby adopted.

(B) Subject to the limitation in Section 1(D), below, the General Manager is hereby authorized to expend funds of the District for official purposes of the operation, maintenance, billing, customer services, construction, debt service payment, capital improvements and other business activities of the District in accordance with the adopted Budget.

(C) The amounts shown within the budget are established as a target level for each specific type of revenue or expenditure indicated. Recognizing that the items listed in the Budget may actually be higher or lower than those estimates, the Director of Finance is authorized to reallocate the adopted Budget within each department. Allocation of funds from one department to another is prohibited. Only the Board is authorized to increase the budgeted amounts for a department. (D) The General Manager is authorized to expend funds not in the Budget in the event of an emergency related to the KLWTD utility system, which the General Manager reasonably believes may result in: danger or injury to persons; damage to assets of the District; or the inability of the district to provide wastewater services. As soon as possible thereafter, the General Manager or Director of Finance shall report to the Chairman of the Board any such actions taken or to be taken in such circumstances. However, such communication shall occur no later than 24 hours after such actions or events.

(E) The Director of Finance shall notify the Board when he or she determines that the actual revenues of the utility system are likely to be less than those indicated in the adopted Budget and shall also prepare a proposed revised Budget for the Board's review and consideration.

(F) The Board authorizes the General Manager and the Director of Finance to do all acts and things required of them by this Resolution and the Budget for the full, punctual, and complete performance thereof, and the Chairman and each member of the Board, officers, attorneys, and other agents of the District are hereby authorized and directed to execute and deliver any and all papers and instruments and to do and cause to be done all acts and things necessary or proper for carrying out the Budget and transactions contemplated by this Resolution, or Florida Statutes.

(G) In the absence of a Director of Finance, the Board may appoint an individual or entity to act on behalf of the Director of Finance and, in such case, all duties and responsibilities listed above of the Director of Finance shall inherently become the duties of that individual or entity.

Section 2. APPLICABILITY AND EFFECTIVE DATE.

Key Largo Wastewater Treatment District FY2025 Budget Book

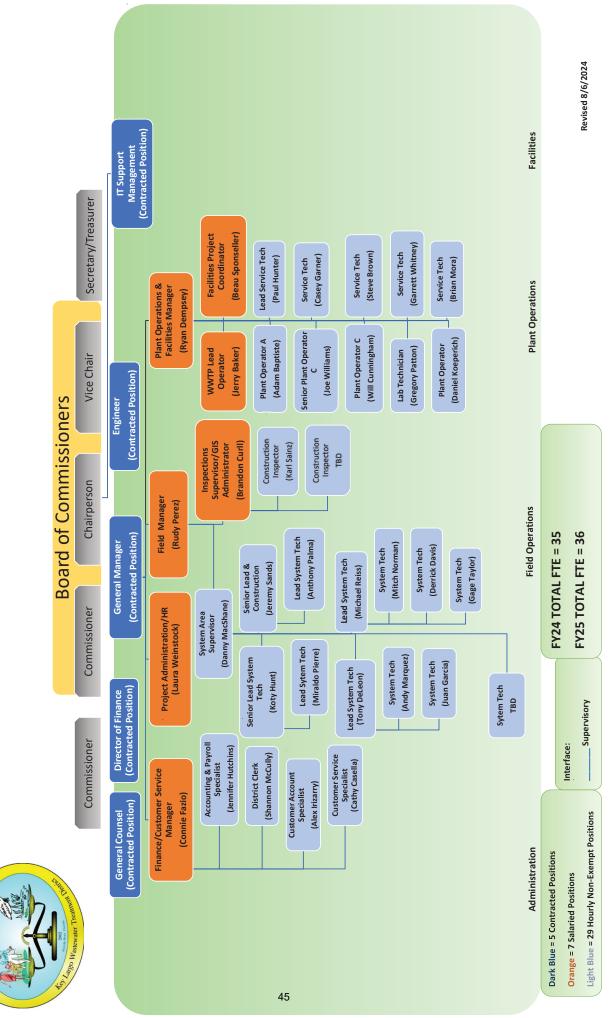

History of Key Largo Wastewater Treatment District

The Key Largo Wastewater Treatment District ("District") was formed as an autonomous independent Special District and political body formed in 2002 by the Legislature of the State of Florida by House Bill 471, enacted as Chapter 2002-337, Laws of Florida, for the purpose of carrying out the planning, acquisition, development, operation, and management of a wastewater management system within the District's boundaries in Key Largo, Monroe County, Florida.

The District operates and maintains a wastewater utility from mile marker 91 to 106 and southern portions of C905 in North Key Largo. It provides service to approximately 10,500 improved parcels and approximately 10,200 accounts are billed monthly, representing approximately 15,100 EDUs. Operating as an enterprise fund, customer charges and assessments pay for the cost of operations and maintenance, debt service, and administrative costs.

The District funds capital improvements primarily through grants and reserves.

BUDGET OVERVIEW

The annual budget is considered one of the most important documents adopted by the District's Board of Commissioners each year. The budget reflects the District's financial policies for the upcoming year by allocating the sources of funds for District services, and projecting expenditures for those services.

The District is focused on improvements that will continue to supply high quality service to our customers. Staff will continue to focus on the collection and disposal of wastewater in the most effective and efficient methods available. External funding sources, including grants, will continue to be aggressively sought.

GENERAL FUND SUMMARY

The District is structured on the basis of one individual enterprise fund. An enterprise fund is established by a government to account for activities similar to private business operations. The intent is that user charges make up for the costs of providing goods or services to the public. Enterprise funds use the accrual basis of accounting. Under this method of accounting revenues are recorded when earned and expenses are recorded when the liability is incurred, regardless of when the cash is received or paid. Also, all assets and liabilities associated with the entity are included on the balance sheet. Generally, accepted accounting principles applicable to enterprise funds are similar to those applicable in the private sector.

Revenues by Source

The Special District of Key Largo Wastewater Treatment District is projecting \$26.33M of revenue in FY2025, which represents a 9.9% decrease over the prior year.

Correction of Weiler Engineering Work Authorization 24-02

Summary of Discussion:

The amount of current FY24 WEC work authorization for Wastewater Plant Engineering Services was incorrect when presented to the Board in 2023. The total amount shown in the work authorization should have been \$85,000 rather than the \$75,000 that was presented. The attached revised work authorization 24-02 corrects that mistake, increasing the authorized amount to \$85,000 to match the approved FY24 budget amount.

Upcoming Construction Projects

| Project | Estimated Total Cost | Status |
|---|---------------------------------|--|
| Upgrades of Odor Control at All Vacuum Stations and Upgrade of the Generators at Vac A and Vac D. | \$1,200,000 (Anticipated) | Weiler Engineering has been directed to proceed with this project in phases, with Vacuum Stations A and D being the first phase. The design of the odor control upgrades, including structural components and site plans continues. Preliminary plan sets have been created for Vacuum Stations A, D, E, G, I, and J/K. The District has requested an expansion of the easement area. The Archdiocese requested monetary compensation for the expanded easement area and approval to transfer assessment waivers to others, presumably for sale of the waivers. District Counsel has determined that the District has no procedures to allow transfer of the assessment waivers. The District will submit a response and proposed compensation in July. |
| Power Conditioning, Lightning Protection & Wiring Upgrades at WWTP | \$3,563,376 (Anticipated) | This project will provide protection from transient surges in power that can damage equipment and potentially cause overflows or inadequate treatment at the WWTP. Installation of a lightning protection system at the WWTP to further reduce the potential impacts due to electrical surges will also be included as part of the project scope. Upgrades to the existing power and instrumentation wiring at the WWTP includes the use of non-corrosive materials and moving wiring above-ground to prevent corrosion and failure. The design of the project will be completed by mid-September. Technical specifications and bid documents have been prepared. |
| Direct Potable Reuse Demonstration Project | \$1,504,301.25 (Anticipated) | The District has budgeted funds for a demonstration project to produce potable water from the WWTP's treated effluent. 2021 Florida legislation established Direct Potable Reuse (DPR) as a preferred effluent disposal method and provides for DPR projects to be eligible for grant funding, treating WWTP effluent as an Alternative Water Supply. The District has applied for a planning grant for this project and has requested grant funding to be allocated for the design, permitting, and construction of the DPR demonstration project. Initial estimates indicate that the volume of water produced in the DPR demonstration project would be in the range of 150,000 to 250,000 GPD. |

| EQ Tank and Headworks Project | \$4,500,000 (Anticipated) | The EQ Tank and Headworks Project involves the installation of a new headworks as an upgrade to the current headworks at the KLWTD WWTP. This project also involves the installation of an influent EQ tank to regulate flow. This project is currently in the design phase with preliminary site plans and structural drawings for the EQ tank. Shop drawings have been received from Hydrodyne and a center flow screen has been selected for the headworks screening, which will reduce the footprint of the headworks space and has a higher catch rate and efficiency than the existing headworks. Due to a lack of a decision by Islamorada on the NPK booster station design, the District in moving forward with completing design, with incorporation of an additive alternate scope of work should Islamorada decide to keep the current booster pump design. |
|--------------------------------------|------------------------------|--|
| Blower Room Modifications Project | \$250,000 (Anticipated) | The KLWTD staff has requested the addition of an access door behind blower #4 to better service the blower. Currently, the other blowers must be removed in order to access blower #4. These modifications will allow for more efficient service of the blowers. This project is currently in the preliminary design phase. |

VPS Mods CO#5-Longer Cables Vac Trailer, Cable Extensions & Wiring Pins

Summary of Discussion:

This change order is for increasing the length of cables which are to be pulled from the front of the emergency vacuum trailer to the receptacles at the vacuum stations due to design changes post-construction, as well as for re-wiring and up-sizing the cables for the 20hp sewage pumps at Vac Stations E, G, and I and providing cable enlarging pin adapters to ensure compatibility and meet the required minimum cable size for the 75 hp pumps at Vacuum Stations A, D, and J/K.

MEMO

To: KLWTD Commissioners

From: Ed Castle, PE – Weiler Engineering

Date: August 20th, 2024

Re: KLWTD VPS Mods Project Change Order #5

Overview:

This memo outlines the recommendations for Change Order 5 related to the Vacuum Pumping Station (VPS) Upgrades project. This project included the emergency vacuum trailer and the modifications needed at the VPSs to connect to the trailer. The proposed changes are needed to accommodate that as-built configuration of the emergency trailer and to accommodate unforeseen electrical conductor upsizing needed to comply with Florida Building Code requirements.

Change Order 5 Recommendations:

- 1. Extension of Power and Signal Cables:
 - **Original Specification:** The initial bid specifications included 25-foot power and signal cables, based on the assumption that the connection points would be mounted on the rear of the trailer and that they trailer could back up to the VPSs.
 - **Change:** KLWTD staff determined that the best configuration for installation of the quick-connects was to locate them near the tongue of the trailer, utilizing the metal bulkhead for added support. With the connection points installed, KLWTD staff deployed the trailer to the VPSs to determine the best location for setting the trailer. Staff determined that a 50' cord length was needed at Vacuum Station E to allow for convenient location of the trailer.
 - **Rationale:** Extending the cables will ensure that all connection points are easily accessible and securely mounted, improving the durability and operational ease of the trailer during emergency deployments.

2. Conductor Sizing for Sewage Pumps:

• **Issue Identified:** The current power conductors for the sewage pumps on the VPS trailer are standardized for 75 HP pumps with connectors sized for a #6 wire gauge. However, some stations, specifically Vac E, Vac G, and Vac I, use 20 HP pumps with smaller #8 wires. It was assumed that since overload protection for the 20 HP pumps is provided in the control panel on the trailer, the existing conduit and conductors feeding the 20 HP pumps would be adequate. However, the National Electric Code (NEC) requires that the conductors be sized consistently with the incoming feed conductors.

- **Change:** It is recommended to pull new conductors from the sewage pumps to the switch panel for the 20 HP pumps to match the wire gauge to the connector size appropriately per NEC requirements.
- **Rationale:** Adjusting the conductor size will ensure compatibility with the existing infrastructure and maintain compliance with NEC guidelines. This approach would standardize connections across stations while accommodating the specific needs of those with 20 HP pumps.

Conclusion:

The proposed recommendations in Change Order 5 are intended to optimize the operation and reliability of the VPS trailer across all KLWTD stations. Extending the cables and resizing conductors, as recommended, would address the challenges encountered during installation and support the overall integrity of the emergency system. WEC and District Staff recommend approval of Change Order 5.

| Description of Work to be Performed: The Contractor is hereby authorized and directed to perform the following Work, generally described as: Procuring additional length of cable and installing longer cable sets for the emergency vac trailer per Weiler Engineering's RFI response #8 and PCO #5 attached. Subject: RE: Removal of Wastewater Assessment for Property - AK# 9105304

Good morning, Based on the discussion from earlier, the partial lot you have purchased is as follows:

Parcel ID 00506000-000100.

This lot is located in the Improved Subdivision (IS) land use district. Pursuant to LDC <u>Section 130-157</u> properties within this Land Use District requires a full platted lot to be developed for a single family residence.

Based on the Property Appraiser's report, the property in question is 'Tavernier Cove No. 1, Key largo, NW $\frac{1}{2}$ Lot 8.'

This indicates the parcel is the NW half of Lot 8. The SE half of Lot 8 is joined in Parcel <u>00506000-000000</u>

Additionally based on LDC Section 130-157 footnote (g)(4) the parcel may be built if the parcel is not a fractional portion of a platted lot.

As this lot is half of Lot 8 it is a fractional portion of lot 8 found in Plat Book 1 Page 103 which prohibits construction of a new SFR.
