

Key Largo Wastewater Treatment District Board of Commissioners Meeting Agenda Item Summary

Meeting Date:
December 16, 2025

Agenda Item Number: G-3

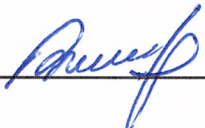

Action Required:
No

Department: General Manager
Sponsor: Peter Rosasco

Subject:
Resiliency Grant Program Awards

Summary:
Mr. Rosasco will discuss the Resiliency Grant Program Awards.

<u>Reviewed / Approved</u>	<u>Financial Impact</u>	<u>Attachments</u>

Projects Receiving Score, Ranked.....	7
Appendix A: Project Proposal Application Form.....	11

Introduction

In 2021, the Resilient Florida Program was created by the Florida Legislature, acknowledging that Florida is vulnerable to sea level rise, flooding and the potential for increasingly severe storms. To address these challenges, Florida must assist communities in adapting critical and regionally significant assets, maintain a statewide vision for both coastal and inland communities and prioritize state resources with a statewide data set and vulnerability assessment (VA). One way the Florida Department of Environmental Protection (DEP or department) will achieve those goals is through the Statewide Flooding and Sea Level Rise Resilience Plan (Statewide Plan) contained within this report. Section 380.093(5)(a), Florida Statutes (F.S.), establishes the requirement for a Statewide Plan.

“By December 1, 2021, and each December 1 thereafter, the department shall develop a Statewide Flooding and Sea Level Rise Resilience Plan on a 3-year planning horizon and submit it to the Governor, the President of the Senate and the Speaker of the House of Representatives. The plan must consist of ranked projects that address risks of flooding and sea level rise to coastal and inland communities in the state. All eligible projects submitted to the department pursuant to this section must be ranked and included in the plan.”

In addition, the statute lists the required elements of the plan, including:

- Overall summary of proposals including:
 - The total number of project proposals received and deemed eligible,
 - The total funding requested, and
 - The total funding requested for eligible projects.
 - A link to access a copy of each submitted project proposal application form separated by eligible and ineligible projects.
- Statewide Plan development process, including:
 - A description of eligibility requirements.
 - A detailed summary of the scoring criteria.
- Project proposal application form.

Summary of Proposal Submittal Process

On April 1, 2025, DEP opened an application portal designed to collect information from eligible project sponsors about implementation projects consistent with section 380.093, F.S., and Chapter 62S-8, Florida Administrative Code (F.A.C.). From April 1 to July 6, 2025, project sponsors were able to enter the application portal and draft an application proposal. DEP staff were made available during this time via weekly, virtual “office hours” to answer questions and aid project sponsors with accessing the application portal and drafting their application proposal.

Beginning on July 7, 2025, the application portal accepted the submission of application proposals. The application portal closed at 11:59 p.m. EDT on Sept. 1, 2025, consistent with 380.093(5)(d), F.S. DEP staff remained available during business hours throughout the entirety of the application submission window to aid project sponsors with submitting their application proposal. An outline of the online form is provided in [Appendix A](#).

How the Statewide Plan was developed

The Statewide Plan was created based on the eligibility requirements in section 380.093, F.S., and the project score in accordance with Chapter 62S-8, F.A.C., both outlined below.

Methodology (eligibility)

To be eligible for the Statewide Plan, a project must address a flooding or sea level rise threat in current or future conditions, and the local sponsor must be an eligible entity.

To be an eligible entity, the entity must be identified in section 380.093(5), F.S.. Eligible entities that can submit proposals to address risks of flooding or sea level rise identified in vulnerability assessments include counties, municipalities and special districts with certain responsibilities. In some cases, other established special districts can submit proposals that mitigate the risk of flooding or sea level rise on water supplies or water resources of the state. Consistent with the program's governing statute, special districts are those that are responsible for the management and maintenance of:

- Airports;
- Inlets and intracoastal waterways;
- Potable water facilities;
- Seaports; or
- Wastewater facilities.

Other established special districts include:

- Drainage districts;
- Erosion control districts;
- Flood control districts;
- Regional water supply authorities; and
- Water Management Districts.

Upon closure of the application portal on Sept. 1, 2025, as outlined in 380.093(5)(d), F.S., all submitted proposals were reviewed to ensure both the applicant and the project met program eligibility requirements. For projects that did not meet the minimum 50 percent cost share requirement, outreach was performed to ensure the applicant understood the cost share requirement and to provide the opportunity to revise their submitted cost share amount.

Eligible projects submitted by eligible entities with a minimum 50 percent cost share were included and ranked in the Statewide Plan. Section 380.093(5)(e), F.S., provides a match waiver for communities eligible for reduced cost share as defined in the excerpt below:

“1. A municipality that has a population of 10,000 or fewer, according to the most recent April 1 population estimates posted on the Office of Economic and Demographic Research’s website, and a per capita annual income that is less than the state’s per capita annual income as shown in the most recent release from the Bureau of the Census of the United States Department of Commerce that includes both measurements; or

2. A county that has a population of 50,000 or fewer, according to the most recent April 1 population estimates posted on the Office of Economic and Demographic Research’s website, and a per capita annual income that is less than the state’s per capita annual income as shown in the most recent release from the Bureau of the Census of the United States Department of Commerce that includes both measurements; or

3. A municipality or county that has a per capita annual income that is equal to or less than 75 percent of the state’s per capita annual income as shown in the most recent release from the Bureau of the Census of the United States Department of Commerce.”

In total, 203 eligible and ineligible proposals were received for a combined cost of \$1,919,506,199. The total state funding request amount for all proposals was \$998,685,013. Applications were received from 120 entities throughout Florida, including 25 counties and county-associated entities, 84 municipalities (e.g., cities, towns and villages) and 12 special districts or other entities.

After reviewing the proposals, 123 implementation proposals were deemed eligible for the Fiscal Year (FY) 2026-27 Statewide Plan and received a priority ranking, with total project costs of \$1,515,226,716. The total funding request amount for all eligible proposals was \$738,707,561. A distribution of all the eligible applications received during this cycle is shown in Figure 1.

Proposals, separated by eligible and ineligible status, can be found at the following [DEP FTP Website](#) using the case-sensitive password: **2025Apps**.

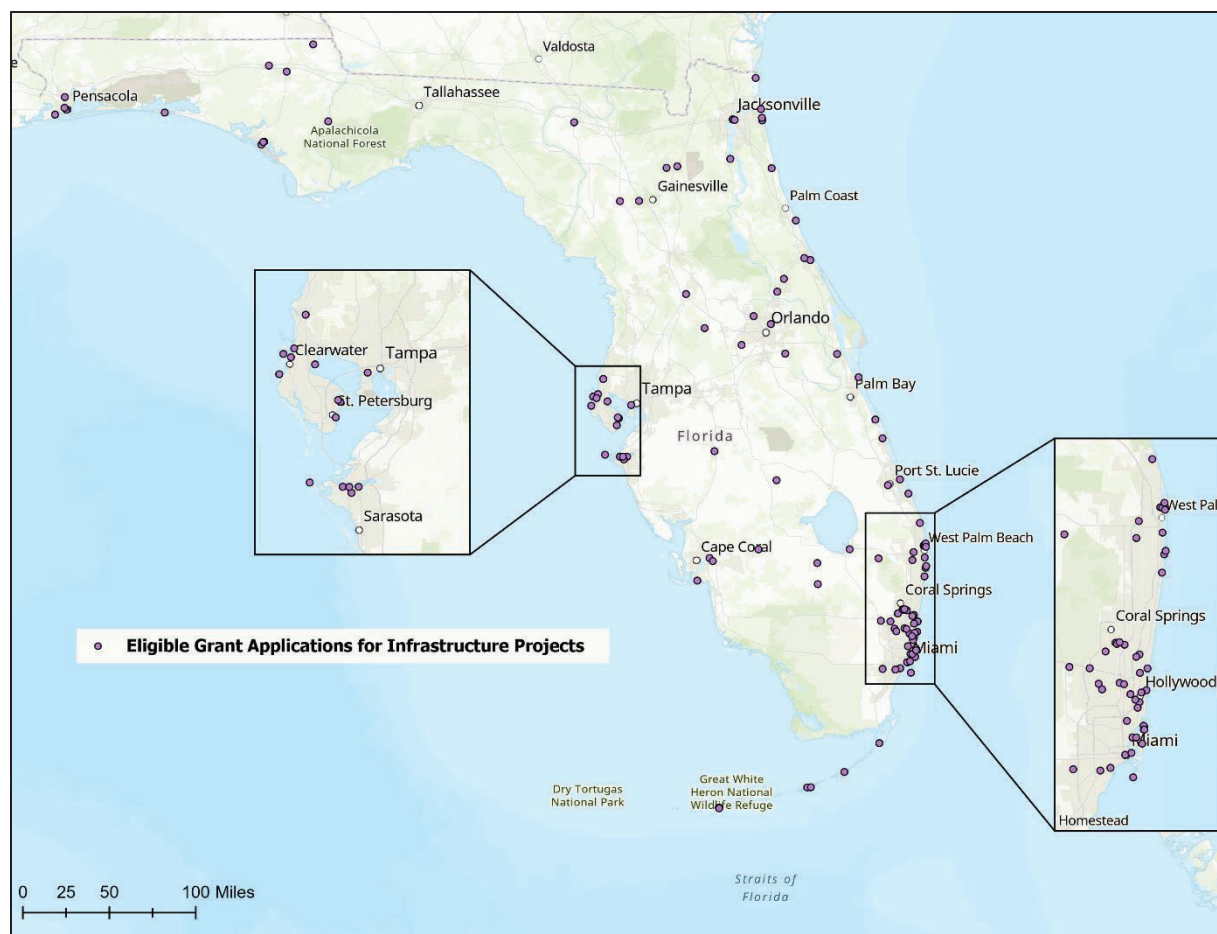

Figure 1. Distribution of eligible proposals submitted during the 2025 application cycle.

Methodology (ranking)

In 2022, following substantial public engagement and input, the program adopted [Chapter 62S-8, F.A.C., “Statewide Flooding and Sea Level Rise Resilience Plan,”](#) to implement scoring criteria outlined in section 380.093(5)(h), F.S. Legislation in subsequent years has further refined the scoring criteria. Most recently, legislation in 2025 added a new scoring criterion related to the National Flood Insurance Program’s Community Rating System.

To satisfy rule requirements and earn the corresponding points, project applicants were required to provide all supporting information and/or documentation needed to evaluate each application criteria to DEP. To aid applicants in drafting and submitting an accurate and complete proposal, a scoring rubric summarizing the rule is provided in “[62S-8 Resilient Florida Program Guidance for Applicants](#).”. The document provides background and other statutory details and context, example responses and specific guidance for each scoring criterion. Additionally, it clearly identifies which criteria require additional supporting documentation and/or explanation for the partial or full award of points.

After all project evaluations were completed, DEP then assigned a priority ranking for each project based on total score. Projects that received the same score received equal rank. The full list of ranked projects can be found in the Statewide Plan Section: [All Projects Receiving Score and Rank](#).

Proposed Projects

The prioritized applications received via the 2025 Resilient Florida grant portal were used to create the list of proposed projects for the Statewide Plan. DEP developed the Statewide Plan based on section 380.093(5)(h), F.S., which requires proposed funding for the Statewide Plan (state funds) be no less than \$100 million per year for three years and on the projected balance for the Resilient Florida Trust Fund of \$100 million for Year 1 (FY 2026-27). Should excess funding be available due to projects being unable to proceed or projects being completed for less than the original request, DEP will reallocate excess funds in the following priority: 1) additional funds for multiyear projects, 2) subsequent years of funding for projects funded in Year 1 and 3) to the next prioritized project in the Statewide Plan.

Of the 123 eligible projects, the top fifteen prioritized projects are proposed for FY 2026-27 State funding. Pursuant to section 380.093(5)(i), F.S., multiyear projects that receive funding in the first year of the project must also be included in subsequent plans and funded until the project is completed (“multiyear projects”), provided the project sponsor has complied with all contractual obligations and funds are available. Multiyear projects in subsequent years are not scored or ranked with other submittals. In addition to the fifteen projects referenced above, with total Year 1 funding totaling \$82,039,821, the FY 2026-27 Statewide Plan proposes continued funding for two multiyear projects totaling \$17,960,179. Funding of these Year 1 projects collectively total \$100,000,000.

Consistent with Section 380.093(5)(a), F.S., the Statewide Plan is designed with a 3-year planning horizon; therefore, the projects proposed for FY 2026-27 State funding also commit \$21,227,592 and \$16,527,500 to the plans in FY 2027-28 and FY 2028-29, respectively. High-ranking projects not identified for Year 1 funding are listed in Years 2 and 3 in priority order and total \$100,000,000 in Year 2 and \$100,000,000 in Year 3. Projects that do not receive funding in FY 2026-27 must resubmit application proposals to be considered for funding in subsequent years.

All submitted eligible proposals are subject to further review and potential modifications based on available funding, project priorities and programmatic needs. Such modifications can be reductions in scope and/or budget to align with fiscal constraints, policy directives or strategic objectives.

Table 1 is a list of all projects receiving a score in ranked order.

Table 1: Projects Receiving Score, Ranked

Rank	Project Sponsor	County	Project Title	Total Project Cost	Cost Share Percentage	FY 2026-27 Statewide Plan, Year 1	FY 2026-27 Statewide Plan, Year 2	FY 2026-27 Statewide Plan, Year 3 +	Cumulative Total
-	South Florida Water Management District	Miami-Dade	Additional funding for previous multiyear project — 26SRP12 C-7 Basin Resiliency	\$50,000,000	50%	\$10,720,000			\$10,720,000
-	City of Fort Myers	Lee	Additional funding for previous multiyear project — 26SRP21 Fort Myers Wellfield Expansion, Redundancy and Flood-Proofing	\$30,861,238	52%	\$7,240,179			\$17,960,179
1	City of Fort Myers	Lee	Central Advanced Wastewater Treatment Facility Resilience Upgrades	\$33,005,473	61%	\$13,005,473			\$30,965,652
2	City of Atlantic Beach	Duval	Resilient Lift Station Project Phase I	\$2,677,442	50%	\$1,338,721			\$32,304,373
3	City of Clearwater	Pinellas	North Beach Stormwater Resiliency	\$13,450,000	52%	\$6,450,000			\$38,754,373
