**OPEN LETTER TO THE KEY LARGO WASTEWATER TREATMENT DISTRICT
BOARD**

**The Island of Key Largo Federation of Homeowners Assoc. Inc. respectfully requests
that the Key Largo Wastewater Board of Commissioners not enter into any agreements
with the Village of Islamorada before the November elections. The issue of whether or
not to bring in sewage from Islamorada has never been an issue in previous elections and
was never mentioned by any candidates previous to the last election. The public should
be allowed to consider this as an issue when voting for Wastewater commissioners. The
coming election is important because it will determine who represents the people of Key
Largo when this matter is finally decided one way or the other.**

Thank you.

June 23, 2010

I, too, have had my own issue at the bank. On more than one occasion, both southbound entrances to my branch were blocked. I have also had comments and complaints from my customers who ride on the bike path to the office that the existing sewer grates for drainage purposes have been filled in with debris. During heavy rains the bike path is 6 inches or more underwater. My landscaper has also informed me that they have pushed large boulders into the bushes on the southbound side which he has offered to remove. They are breaking off my bushes at the base. When I have had an opportunity to talk to the contractors, they do not seem to understand my concerns. I will say they have been better at leaving open 1 entrance after the 2nd or so request. Also when the first group came through they actually took out my incoming water line which left us with no water (toilets included) for more than half the day. What was worse is they didn't even bother to come in and tell us. When what was left in the hot water tank ran out I went out and asked them if something was wrong and they then mentioned they had broken a pipe and it wasn't their fault because whoever buried it in the first place put it too close to the roadway! Needless to say 3 or 4 hours later they finally got us up and running only to take out the water main 3 buildings down. Out of water again!!! It has been a challenge as well for us and we are not even a tourist driven business.

Nola Acker
First State Bank

Jackie,

We have seen a steady decline in walk-in business at all our properties (Ramada, Marina Del Mar, Holiday Inn) over the past 45 days. Prior to construction we had been experiencing an increase in walk-in business, most likely, because more travelers are arriving in the Keys without prior reservations. Our sister property, the Marriott Key Largo at mile marker 103 has not experienced this decline in walk-in business. Makes sense since they are not currently in the midst of all the construction and offers us another reference point. I have submitted a critique to my corporate sales team and attribute much of the decline to the state of our entrances to the properties (either blocked or under construction) and the inconvenience of navigating the construction to get on property.

We also had a situation when work was being conducted on Laguna Drive which runs down the side of the Holiday Inn Property. We have employee parking in a stone driveway along Laguna Drive. The employees who arrived in the morning parked in the employee parking but when they went to leave that afternoon they were trapped. They were told by the workers that they had to drive their car over the curb into the guest parking for the hotel – basically - tough luck. One of the employees who had just purchased a new car and she refused. She was very upset and told them that had to leave at least one spot open for employees to come and go.

July 6, 2010

About 2 weeks ago on a Monday morning around 9:30 a worker for Metro came by the office and asked if I had keys to a truck parked out front. I explained it was an employee's and that he was not at the office but out in the field working. I was told that I needed to get the truck moved as they were getting ready to start working in front of the truck. I told him that I would call the supervisor and see if I could get someone here to move it. I stated that if we had known that they were starting work there on the previous Friday, we could let everyone know so no one blocked them. He told me that I should have known they were working there because they had been 4 businesses down on the previous Friday. (Note, 4 businesses down, not next door)

The supervisor said they were unloading a truck and could be back in about an hour. I told that to the Metro worker and he said to not bother, the truck would be buried under dirt by then. They proceeded to start trenching and piling the dirt all around the employee's truck. I called the supervisor, who sent someone to talk to the guys trenching. They said they would do their best not to mess up the truck (which they did a fine job).

My issue is not with the dirt around the truck, but with the lack of advance notification, lack of daily schedule and the rudeness of the workers.

I had a second issue of rudeness last week. They were working south of First State Bank but at 4:30 moved a piece of equipment in our yard. They parked it directly in front of where our semi parks. Normally this would not be a problem but on that day, the semi was out at a job and at 4:30 was on the way back to the yard. I very nicely asked the crew if they planned to leave that truck there because our semi was on the way back to the yard. He very rudely said, "Uh, no. We have other jobs to go to tomorrow. This is not our only job, you know." I very nicely said ok, thank you, I just wanted to make sure our guy could get back in. He kind of huffed and walked away.

July 2, 2010

Fellow Commissioners:

I deeply regret that I will miss today's meeting, but an annual family obligation has taken me out of town.

I have spent the last two weeks driving through our neighborhoods and researching many of our issues so I hope you will allow my comments to be entered into the record.

1. I would like to be a part of the item G-2's discussion and wish you take no action today on this item.
2. Item H-9: Commissioner Tobin is correct in that we need better exchange of information between our citizens and our contractors. Even as a Commissioner I cannot get information on the timetable in my own neighborhood.
3. Item H-50 Commissioner Brooks is correct. There is a moratorium on raises.

On all other agenda items, I have faith that you do what is best for the Key Largo Wastewater Treatment district, without me.

EXCEPT ITEM F.

I have made copies of the original W.F. McCain Plan for these properties dated Feb. 02, 2010. These plans show the engineered design that we paid for. Somebody changed the location of the buffer tank for Kona Kai without authorization.

I personally spoke with inspector Chuck Grubb and he told me "HELL NO" he did not change it. Our engineer Margaret Blank did not change it; and our manager did not change it.

This unauthorized change has put us in the middle of a personal feud between two of our constituents. Not only is this causing us time and money, but it is setting us up as a party to a lawsuit. It is in the best interest of the district to not get involved in this lawsuit.

If I was at today's meeting I would make the motion to immediately proceed with the installing of the buffer tank as originally engineered and end further delay.

AMEN! Commissioner Robert Majeska

My cell phone is on, and I will be available by phone if you need any clarification on this, or any other issue.

**Re: July 6, 2010 Key Largo Wastewater Treatment District Board of
Commissioner's meeting, item F. KONA KAI/ROCK REEF TIME
CERTAIN 6PM**

Dear Mr. Dillon,

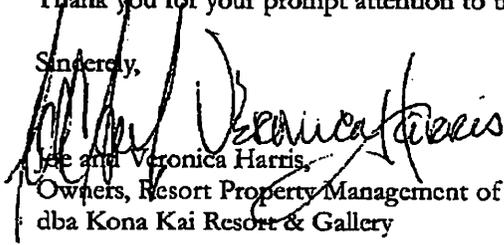

It is our understanding the KLWTD Board's decision on Tuesday, July 6th is to support their original motion of June 1, 2010, to relocate the buffer tank that will serve Kona Kai to the public right of way in front of the Kona Kai property. We further understand the new tank location is to be specified by us, the owners of Kona Kai Resort and Gallery. We are prepared to meet with KLWTD on-site to select our location of choice and thus await contact by KLWTD.

We request KLWTD provide new, signed and dated, engineering drawings after an acceptable location has been determined and prior to the start of trenching. We request one dated and signed copy of these drawings be handed directly to us as well as to all sub-contractors involved so there is no misunderstanding or disagreement about the new location.

Lastly, based upon Mr. Higgins' direction at the same board meeting of July 6, 2010, we understand all damage to our current landscaping caused by the relocation of the buffer tank site, including permitted landscaping in the FDOT right-of-way, will be replaced at the expense of KLWTD. We expect this will be done in a timely and professional manner, by professional landscapers. We are happy to provide photos as necessary.

If our understanding regarding any of the foregoing is in any way in error or if we may provide any further information, please contact us at your earliest opportunity.

Thank you for your prompt attention to these matters.

Sincerely,

Lee and Veronica Harris,
Owners, Resort Property Management of the Keys, Inc.,
dba Kona Kai Resort & Gallery
